Card back test sheet: bezel

Cluedo Robot Players: 21 card backs with the same mark in every corner; the ring round the compass is the code.

Printing

1. Print pages 2 to 4 at actual size: 100%, with "fit to page" turned off.
2. Check the bar at the bottom of this page measures exactly 100 mm. If it doesn’t, the cards are the wrong size.
3. Laminate the sheets. Cut out the cards on pages 2 to 4 along their edges.
4. Write each card’s name, printed under it, on its blank front.

Taking the test photo

1. Lay the cards face-down in rows: one row per player, and one for the envelope. Leave a finger’s width between cards and a wider gap between rows.
2. Hold the phone about 40 cm above the cards, tilted a little away from straight down so the ceiling light’s reflection misses them. No flash.

Where each card is

Page 2	Scarlet · Mustard · White Green · Peacock · Plum Candlestick · Dagger · Lead Pipe
Page 3	Pistol · Rope · Wrench Bathroom · Bedroom · Courtyard Dining Room · Game Room · Garage
Page 4	Kitchen · Living Room · Office

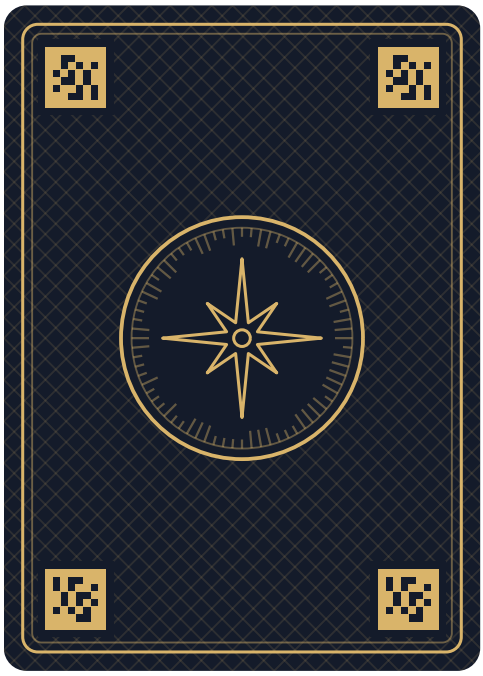

Every card carries the same 8 mm mark in each corner, which only tells the camera where the card lies. The code is the ring of graduations round the compass: a tick every 5 degrees, each long or short. Any two cards differ in at least 24 ticks.

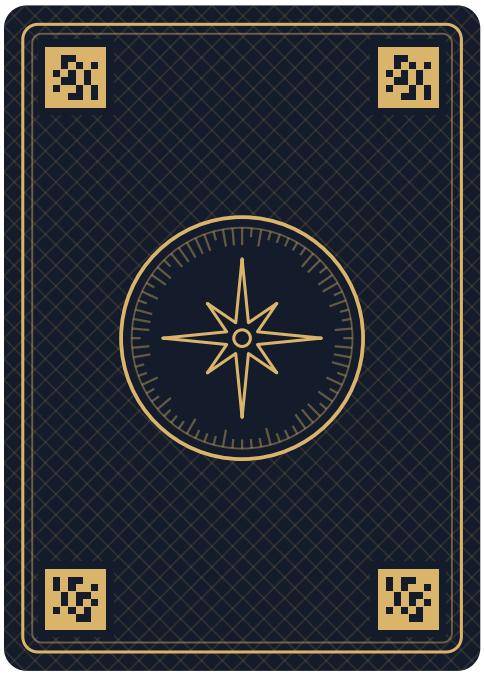

This bar should measure 100 mm.
