Card back test sheet: corner marks

Cluedo Robot Players: 21 card backs, each with the same four corner marks in its own order.

Printing

1. Print pages 2 to 4 at actual size: 100%, with "fit to page" turned off.
2. Check the bar at the bottom of this page measures exactly 100 mm. If it doesn’t, the cards are the wrong size.
3. Laminate the sheets. Cut out the cards on pages 2 to 4 along their edges.
4. Write each card’s name, printed under it, on its blank front.

Taking the test photo

1. Lay the cards face-down in rows: one row per player, and one for the envelope. Leave a finger’s width between cards and a wider gap between rows.
2. Hold the phone about 40 cm above the cards, tilted a little away from straight down so the ceiling light’s reflection misses them. No flash.

Where each card is

Page 2	Scarlet · Mustard · White Green · Peacock · Plum Candlestick · Dagger · Lead Pipe
Page 3	Pistol · Rope · Wrench Bathroom · Bedroom · Courtyard Dining Room · Game Room · Garage
Page 4	Kitchen · Living Room · Office

Every card carries the same four 8 mm marks, standing for 1 to 4, one in each corner. Which corner holds which number tells the cards apart. The marks all face the card’s top, so the reader knows where to start.

This bar should measure 100 mm.
