Card back test sheet

Cluedo Robot Players: 21 card backs with corner markers, and a marker size test.

Printing

1. Print pages 2 to 5 at actual size: 100%, with "fit to page" turned off.
2. Check the bar at the bottom of this page measures exactly 100 mm. If it doesn’t, the cards are the wrong size.
3. Laminate the sheets. Cut out the cards on pages 2 to 4 along their edges.
4. Write each card’s name, printed under it, on its blank front. Keep page 5 in one piece.

Taking the test photo

1. Lay the cards face-down in rows: one row per player, and one for the envelope. Leave a finger’s width between cards and a wider gap between rows.
2. Hold the phone about 40 cm above the cards, tilted a little away from straight down so the ceiling light’s reflection misses them. No flash.
3. Photograph page 5 as well. The app will say which marker sizes and shades it could read.

Where each card is

Page 2	Scarlet · Mustard · White Green · Peacock · Plum Candlestick · Knife · Lead Pipe
Page 3	Revolver · Rope · Wrench Bathroom · Bedroom · Courtyard Dining Room · Game Room · Garage
Page 4	Kitchen · Living Room · Office

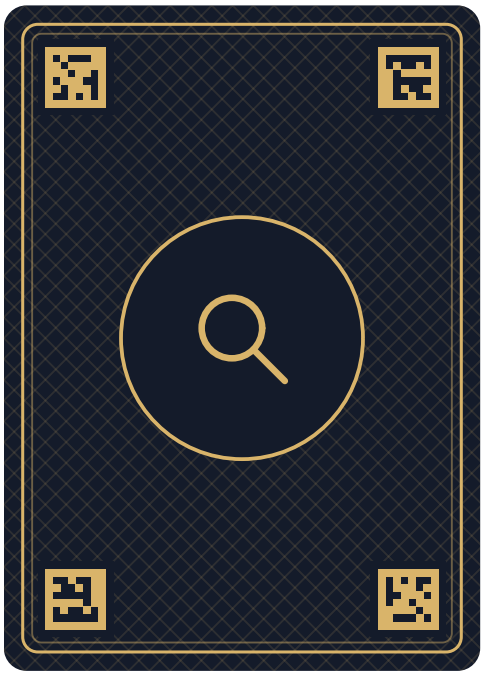

Each card carries its code in two corners, 8 mm across: top left, and bottom right turned upside down. The other two corners hold a decoy that is the same on every card.

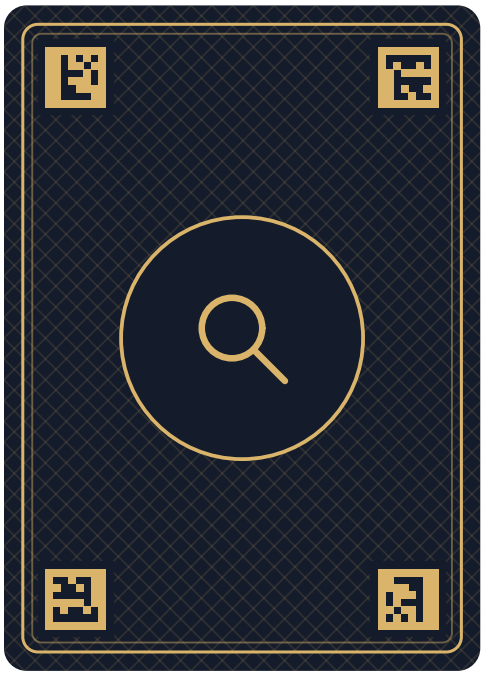

This bar should measure 100 mm.

Scarlet

Mustard

White

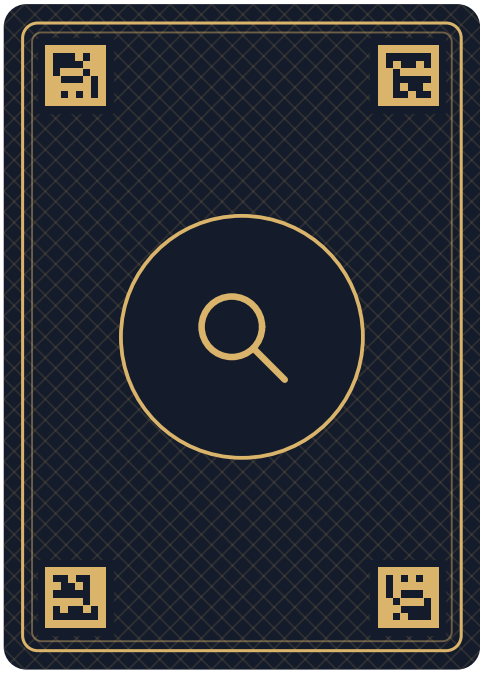

Green

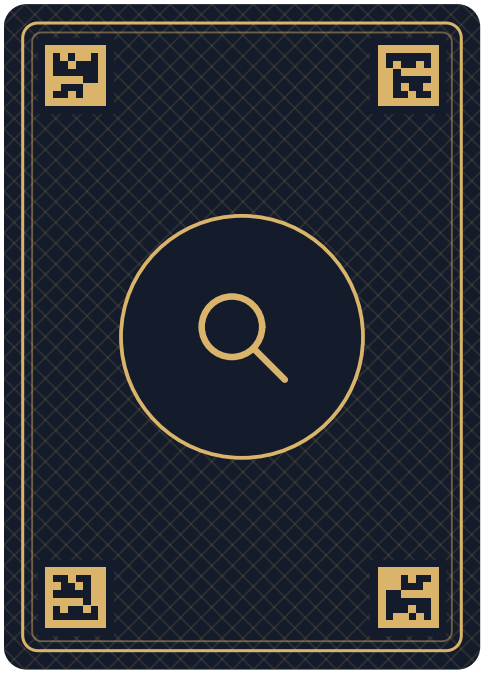

Peacock

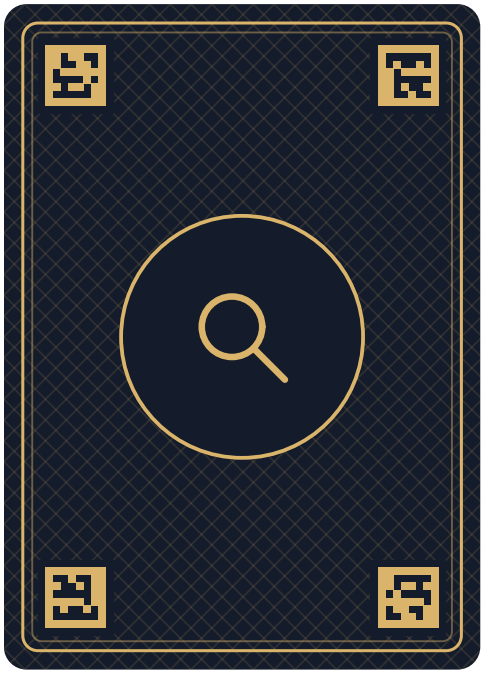

Plum

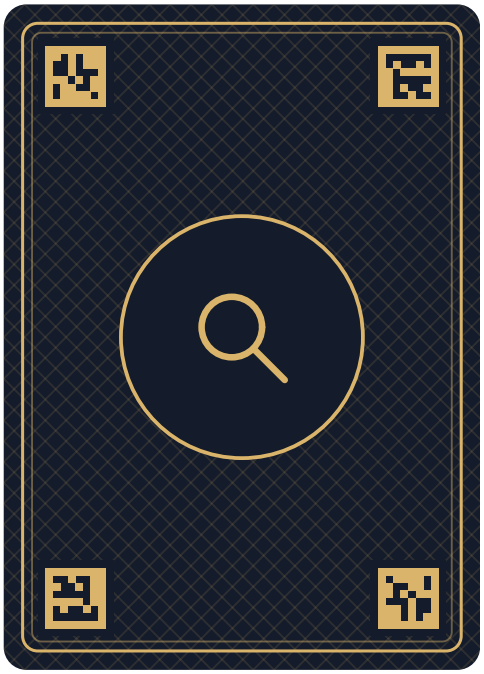

Candlestick

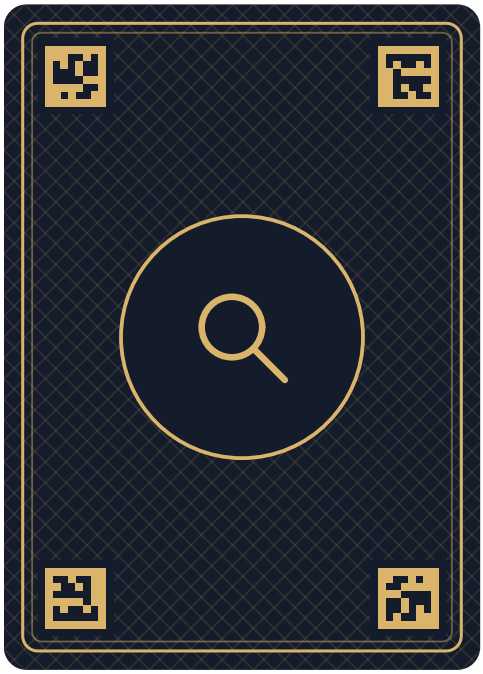

Knife

Lead Pipe

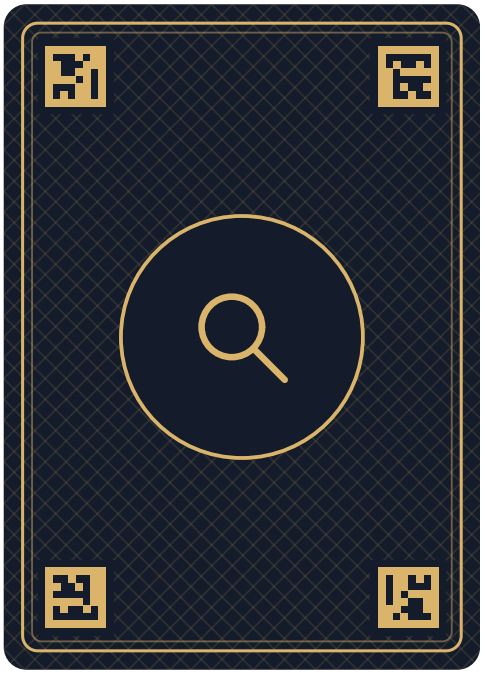

Revolver

Rope

Marker size test

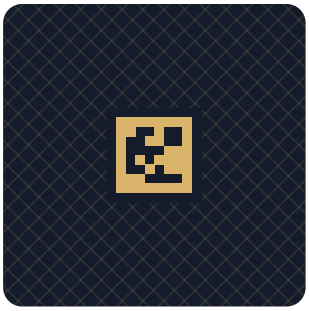

Keep this page whole. Each square holds a different marker; the app reports which ones it can read.
